Summary

Software Engineer with 5+ years of experience building web applications and APIs. Skilled in Node.js, React, and SQL/NoSQL databases. Have worked across the stack, from backend services to frontend UIs, in fast-paced product and consulting firms.

Skills

Languages	Node.js, TypeScript, JavaScript, HTML, CSS
Frameworks & Libraries	React, Next.js, NestJS, Express.js, Tailwind CSS
Databases & Caching	PostgreSQL, MySQL, MongoDB, Redis
Testing	Jest, Vitest, React Testing Library, Playwright
DevOps & Cloud	Docker, Kubernetes, AWS, GitHub Actions

Experience

Lead Solution Engineer | IBS Software

Jul 2025 – Mar 2026

Kerala, India

- Worked on the frontend of a large-scale travel booking platform handling flights, hotels, and ancillary services, used by customers across multiple regions.
- Worked closely with stakeholders to understand customer requirements, and created detailed technical documentation to guide implementation across the frontend team.
- Contributed to the company's in-house component library, helping improve consistency and reusability across the platform's UI.

Software Engineer | Micro.company

Sep 2024 – Jun 2025

Remote

- Worked on building an AI-powered browser automation tool that lets users perform web actions through natural language instructions.
- Designed, built, and shipped a Shopify app that allows merchants to set up a store locator and add it to their storefront, taking it from idea to production.
- Was involved in product design discussions and helped shape the direction of the product, including feature prioritization and UX decisions.

Consultant II | Neudesic

Jun 2022 – Sep 2024

Kerala, India

- Designed and built a comprehensive API template that was adopted as the standard base for all backend services at one of India's major airlines.
- Developed and maintained a wide range of APIs for the airline's ticket booking platform, which are actively used by millions of passengers.
- Raised the overall code quality of the team by introducing unit and end-to-end testing practices and standards, eventually reaching near 100% code coverage.

Software Engineer | Bititude

Jul 2020 – Jun 2022

Remote

- Built a real-time video conferencing system with integrated chat, used for conducting live classes inside a learning management system.
- Designed and built reusable, extensible Calendar and Table components that were later adopted across several other projects in the company.
- Led a small team of developers through the full lifecycle of a project, from planning to delivery, making sure timelines and goals were met.

Education

Bachelor of Computer Applications | University of Calicut

2017 – 2020
