SUMMARY

Software engineer with 5+ years of experience shipping web platforms and APIs across travel, e-commerce, and ed-tech. Built booking APIs processing 150,000+ bookings a day for one of India's largest airlines, delivered storefronts for a leading global online travel agency, and took a Shopify app from idea to launch. Strong in TypeScript, Node.js, and React.

EXPERIENCE

Lead Solution Engineer | IBS Software

Jul 2025 – Mar 2026
Kerala, India

- Delivered frontend features for a large-scale travel booking platform covering flights, hotels, and ancillary services, powering regional storefronts of a leading global online travel agency serving 100,000+ monthly visits.
- Built and extended components in the company's in-house UI library used across the organization, improving consistency and reuse between product teams.
- Translated stakeholder requirements into detailed technical documentation that guided implementation across the frontend team.

Software Engineer | Micro.company

Sep 2024 – Jun 2025
Remote

- Sole engineer on an AI-powered browser automation tool that performs web actions from natural-language instructions, owning architecture, implementation, and deployment end to end.
- Designed, built, and launched a Shopify app that lets merchants add a store locator to their storefront, taking it from idea to a product published on the Shopify App Store.
- Helped shape product direction through design discussions, feature prioritization, and UX decisions.

Consultant II | Neudesic

Jun 2022 – Sep 2024
Kerala, India

- Developed and maintained core APIs for the ticket booking platform of one of India's largest airlines, processing 150,000+ bookings per day.
- Designed and built an API template adopted as the standard base for the airline's backend services.
- Introduced unit and end-to-end testing practices and standards, raising the team's overall code quality and driving coverage to near 100% on the services I worked on.

Software Engineer | Bititude

Jul 2020 – Jun 2022
Remote

- Built a real-time video conferencing system with integrated chat for live classes in a learning management system, implemented first with WebRTC and later migrated to Agora.
- Led a small team of developers and a tester through the full lifecycle of the LMS project, from planning to delivery.
- Designed reusable, extensible Calendar and Table components later adopted across several other projects in the company.

SKILLS

Languages	TypeScript, JavaScript, HTML, CSS
Backend	Node.js, NestJS, Express.js
Frontend	React, Next.js, Tailwind CSS
Databases & Caching	PostgreSQL, MySQL, MongoDB, Redis
